

OIL AND GAS AUTOMATION SOLUTIONS

POWERING EFFICIENCY

Field Automation

- Flow Computers (RTU's, PLC's, EFM's)
- Gas & Liquid Measurement
- Meter Runs
- Wireless Monitoring Systems
- SCADA & Telemetry Systems
- Instrumentation - Pressure, Level, Flow, Temp, Density
- Condition Monitoring (Compressors, Pumps)
- Artificial Lift Control and Optimization
- Solar and Power Options
- Site Surveillance & Security
- Turn-Key Wellpad Solutions

Electrical Installation

- Licensed Master Electricians
- Complete Installation Services
- Generators
- Pump/Motor Installation

Automation Services

- Project Engineering / Management
- PLC, RTU, HMI Programming
- Calibrations
- Gas Analysis
- Instrumentation Troubleshooting

Custom Panels

- Panel Design & Layout
- Factory Acceptance Testing
- Quality Assurance

Environmental Compliance & Safety

- Emissions Monitoring
- Flame & Gas Detection
- Thief Hatch Sensors
- H2S Monitoring

Systems Integrator

C&G Energy Services integrates component subsystems to provide our clients with a working solution. As such, we do not limit our offerings and/or expertise to specific vendors and components. Please inquire about our preferred partners to fit your application.
